Mastering Game Bots 2026/2027
Assignments

Marek Szykuła

October 14, 2026

Assignment 1 – The choice

Max score: 1 point.
Deadline: October 21, 14:00 (end of the lab).

1. Choose one of the bot programming games that you will work on during the course. Past contest games from Lecture 1 are recommended and games you have not worked before:

   - Green Circle (2022)
   - Cultist Wars (2022)
   - Keep on the Grass (2022) – Fall Challenge
   - Fourmis (Ants) (2023) – Spring Challenge
   - Seabed Security (2023) – Fall Challenge
   - Olymbits (2024) – Spring Challenge
   - Cellularena (2024) – Winter Challenge
   - Soak Overflow (2025) – Summer Challenge
   - SnakeByte (2026) – Winter Challenge
   - Troll Farm (2026) – Spring Challenge

   Note: There will be a HUGE bonus (sufficient for the maximum grade alone) for beating my bot in any of these listed past contest games. This does not mean I will not submit any new version of them, especially if exploited. The exact conditions will be provided in the last assignment.

2. Find and read Post-Mortems of top players concerning this game (usually under the subject "Feedback and strategies").

3. Reach at least Bronze League to unlock full rules.

4. Discuss the game and your ideas with me (at the lab or via Discord).

5. Submit two links: the link to your CodinGame profile and the link to the chosen game as a solution to Assignment 1. Ensure you have "University of Wrocław" as the school in your profile.

Assignment 2 – Evaluation and local testing

Max score: 2 points + 1 extra point.
Deadline: November 4, 14:00 (end of the lab).

1. Prepare the Benchmarker (`Benchmarker (generic) 2026` from SKOS) for the chosen game, so that you can test locally. You can use a different tool if you prefer (but I suppose mine is more efficient).
2. Implement an evaluation function (or heuristic action selection if applicable).
3. Use local testing to test your evaluation ingredients and tune weights. Show at least 3 nontrivial versions, where each of them confidently wins at least 60% with the previous best one.
4. Reach at least Silver League. (+1 extra point for reaching at least Golden League.)
